MESSAGE FROM THE PRINCIPAL

Dear Parents and Guardians,

As we begin Term 2, I would like to take a moment to congratulate our students and teachers on an outstanding Term 1. It has been a term of growth, change, and adaptation, and I am truly proud of how our school community has embraced new developments with positivity and resilience.

The start of a new term offers us an important opportunity to reflect - both on our successes and on areas where we can continue to improve. Over the coming weeks, parents will have the opportunity to meet with teachers to discuss student progress and learning goals. I encourage all parents to take part in these discussions, come prepared with questions, and work together with teachers to ensure that our students remain at the heart of every conversation.

Looking ahead, Term 2 will be a busy and exciting one. Our Semester 1 examinations are approaching, and teachers are hard at work preparing students to demonstrate their learning. In addition to our academic focus, we have a number of events planned that promise to make this term both enjoyable and enriching. I am confident that our teachers will continue to provide meaningful, engaging experiences that inspire our students to reach their full potential.

Thank you for your continued support and partnership. Together, we can make Term 2 another successful chapter in our school's journey.

Warm regards,

Mr. Jonathan Bosman

Principal

PRIMARY SCHOOL REPORT

Dear Parents,

As we come to the close of October, we are delighted to reflect on the exciting learning and memorable experiences our students have enjoyed over the past few weeks.

One of the highlights this month was our STEM Day, where students engaged in hands-on experiments and problem-solving challenges across Science, Technology and Mathematics. Their creativity and curiosity were on full display as they collaborated with classmates and explored real-world concepts through interactive learning.

We also had our term break, providing students with a well-deserved opportunity to rest and recharge. After the holiday, we officially began Term 2, and we are pleased to share that our club activities have now started. The students are enthusiastic and eager to participate in a wide range of clubs that support their interests, talents, and holistic development.

To end the month on a festive note, we are eagerly looking forward to our Halloween celebrations. This much-loved event brings great excitement to our campus, and we can't wait to see the joy and imagination shine through in our students' costumes and activities.

Thank you for your ongoing support and for being such an important part of our school community. We look forward to another month of growth, discovery, and joyful learning ahead.

Warm Regards,

Ms. Luné

HIGH SCHOOL REPORT

Dear Parents and Guardians,

October has been a vibrant and eventful month for our high school community. We kicked things off with an exciting STEM Day, which was a tremendous success. Our students showcased their creativity, innovation, and teamwork through a variety of impressive projects. It was truly inspiring to see their talents on full display, and the energy throughout the day was electric.

Midway through the month, we began our new academic term, and it's been heartening to see both students and teachers return refreshed and ready to engage. Across both Secondary and High School, students have settled well into their routines and are making steady progress in their programs.

Looking ahead, we're excited about the upcoming Halloween celebrations, which promise to bring some festive fun and creativity to our campus. It's always a joy to see the school community come together in the spirit of celebration.

We'd also like to remind you that Parent-Teacher Conferences (PTCs) will be held later this month and into November. These meetings are a valuable opportunity to discuss your child's academic journey, celebrate their achievements, and collaborate on areas for growth. Our teachers are looking forward to connecting with you and sharing insights into your child's progress.

Thank you for your continued support and involvement in our school community. We look forward to another month of learning, growth, and shared success.

Warm regards,

Mr. Deepak Maharaj

HALLOWEEN EVENT

INTEGRATED SCHOOL UPDATE

Dear Parents,

This month, all our students completed their first midterm exam. This will allow them to know what they have done well, and where there is room for improvement. Hopefully, this will encourage them to try their best for the rest of the semester.

Mid-term reports have been sent to parents. Parents and teachers have had the opportunity to meet to discuss the students' progress from 27 October 2025 to 14 November 2025.

Our students did very well in STEM Day on 10 October 2025. Each class prepared their work and both teachers and students had an amazing time.

On October 20, at Le Hong Phong High School for the Gifted (Cho Quan Ward, HCMC), the Ho Chi Minh City Police Department, in collaboration with the Department of Education and Training and various partners, launched the nationwide campaign “Not alone - Together for online safety”. The campaign was simultaneously broadcast to 931 connection points across middle schools, high schools, colleges, and vocational institutions in the city.

Our students from year 6 to year 9 had a chance to learn some more ways to protect themselves. The campaign’s core message, “Not alone - Together for online safety,” sends a strong signal: every child has the right to be safe, heard, and protected-both in the physical world and online.

Warm Regards,

Ms. Kim Tri

STEM UPDATE

Dear Parents,

The STEM Day, themed “Your Planet Needs You”, wrapped up Term 1 with great excitement and inspiring learning experiences. Our students had a wonderful day transforming into scientists, engineers, and inventors, working together to apply STEM knowledge to solve real-world environmental challenges.

Students across all grades participated in hands-on projects — from making eco-friendly jewelry and guiding the mTiny robot to clean a “green city,” to turning recycled materials into creative inventions and exploring wind energy through fun races.

Older students tackled advanced missions such as programming rescue robots, building solar-powered devices, and testing strong “Lifeline Bridges.” Through these activities, students not only gained a deeper understanding of how science helps protect the environment, but also experienced the joy of creating and overcoming challenges together.

In particular, our senior students (Grades 6–IGCSE2) proudly showcased their long-term CREST STEM Fair projects during STEM Day. These projects reflect their persistence, creativity, and strong research spirit. We look forward to witnessing their continued growth as young innovators in the coming term.

STEM Day was a true success in sparking students’ passion for science and fostering key 21st-century skills such as teamwork, critical thinking, and problem-solving. Above all, they learned that even small actions can make a big difference for our planet.

As we move into Term 2, students will embark on their Robotics & Coding journey — developing logical thinking, creativity, and technological skills through hands-on projects tailored to their age levels, while building a strong foundation for more advanced STEM projects in future terms.

Best regards,

Ms. Nhu
